

# One-on-one Intensive ABA Therapy

Teaching is individually tailored to each child and beginning stages rely heavily on one-on-one therapy. The focus includes communication, cognitive play, social, self-help, and other functional skills. The number of direct intervention hours provided to a child may range from 15 to as many as 30-40 hours a week.

## First Clinical Meeting: PHP 50,000

3 hour assesment that serves as baseline in creating the individualized program of the child. The fee includes 2-hour parent training that will be scheduled with the clinical team.

## Little Learners Program

Preschool is both an exciting and challenging time for most parents. This is especially so for parents whose children have some challenges in the areas of socialization and communication. Little Learners acts as a stepping-stone to help preschool children acquire monumental school readiness.

### Setting and Format

A classroom setup similar to most regular preschool classrooms to include various distractions and routines facilitate generalization and future integration. A school day is structured so that part of the day is allotted to large group learning whilst another part focuses on smaller groups (e.g. 1:1 or 1:2).
